SUMMARY

Junior Frontend Developer with practical project experience in React, Next.js, TypeScript, responsive user interfaces and REST API integration. In May 2026, I completed an 872-hour Fullstack Developer Course at GoIT Academy and gained additional foundations in Node.js, backend structures and API communication.

My professional focus is clearly on frontend development. I care about clean component structures, understandable user interfaces, responsive layouts and maintainable code. I am looking for a Junior Frontend position in Germany where I can contribute to real product features, learn through code reviews and continue developing within an experienced team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3
Styling & UI: CSS Modules, Tailwind CSS, Responsive Design, Mobile-First Design
State Management: Zustand, basic knowledge of React Query / TanStack Query
API & Data: REST APIs, Axios, asynchronous data handling, Loading States, Empty States, Error Handling
Tools: Git, GitHub, npm, ESLint, Vercel, VS Code
Backend Foundations: Node.js basics, REST APIs, client-server communication
Working Style: component-based development, reusable components, structured project data, clean code, frontend deployment

PROJECT-BASED PRACTICAL EXPERIENCE

NoteHub - Task and Note Management App

Live: <https://note-hub-drab.vercel.app/>

GitHub: <https://github.com/Anastasiya-git/NoteHub>

Tech Stack: Next.js, TypeScript, Zustand, App Router, CSS Modules

- Developed a task and note management app with a modern, responsive dashboard interface
- Implemented the Next.js App Router structure, task UI, filters, detail views and modal windows.
- Used TypeScript and Zustand for typed, organized and predictable client-side state.
- Created reusable components such as task cards, filter elements and detail views.

Movie Finder — Movie Search Web App

Live: <https://movie-finder-ebon-zeta.vercel.app/>

GitHub: <https://github.com/Anastasiya-git/MovieFinder>

Tech Stack: React, Axios, React Hot Toast, REST API, TMDB API

- Developed a movie search application connected to the TMDB API
- Implemented search functionality, result lists, detail pages, cast information and reviews
- Built API requests, loading states, empty states and error handling for a better user experience.
- Structured the application into focused and reusable React components.

Portfolio Website - Personal Frontend Portfolio

Live: <https://anastasiya-totska-github-io.vercel.app/>

GitHub: <https://github.com/Anastasiya-git/anastasiya-totska.github.io>

Tech Stack: Next.js, TypeScript, Framer Motion, CSS Modules, Vercel

- Designed and developed a personal one-page portfolio for projects, CV downloads and contact links
- Created recruiter-friendly project summaries with live demos, GitHub links and short case studies
- Implemented typed project data, reusable project cards and modal project views
- Optimized responsive layout, clear user guidance, SEO metadata and production-ready Vercel deployment.

Sama Zlipula - Public Website for a Small Food Business

Live: <https://www.samazlipula.com/>

Tech Stack: Next.js, React, CSS Modules, Responsive UI, Vercel

- Developed a live public website for a small food business.
- Implemented a responsive user interface for mobile and desktop devices
- Structured page sections, content blocks and visual elements with a focus on clear user guidance
- Prepared and optimized images, spacing, layout and deployment via Vercel.
- Private repository because it belongs to a closed codebase.
